It was definitely the Underdog starting to start the next closest in price is the \$149 KitchenAid. More and more often, though, all kinds of fancy-pants blenders that boast ginormous capacities, powerful motors that sound like helicopters in flight, and special features like touch screens and single-serving attachments are popping up in stores. So we tested this \$39 model against the \$149 KitchenAid 5-Speed Diamond Blender, the \$199 Cuisinart PowerEdge 1000 Watt Blender, the \$199 Breville Hemisphere Control Blender, the \$199 Ninja Ultima Blender, the \$454 Blendtec Designer Series Wildside Blender, and the \$529 Vitamix 7500 Blender to see what you might be missing if you opt for a budget model over a significantly more expensive one. I found out that it's very difficult to definitively recommend one over any of the others. Overall, though, it couldn't make the transition to almond butter (and neither could the Cuisinart). If jar or cutting blade assembly is damaged, do not use. Avoid contact with blades or moving parts. Using Your Blender (cont.) ICE CRUSH Press the PULSE/ICE CRUSH button briefly to cycle the blender on and off until desired consistency is reached. SMOOTHIE This blender has a unique 45-second cĂĂĂSmoothiecĂĂĂ cycle. These simple and relatively basic recipes with "softer" ingredients will do just fine. There's nothing superfluous here at all, just good old-fashioned blender settings, nicely arranged for effortless reading and operation. But don't forget that it's over \$100 less than any of the other models, so I still think it's quite an impressive little blender. Design, usability, and features This blender has a height of 14.5 inches, an 8.5-inch depth, and a 7-inch width. The KitchenAid and the Breville actually turned the block into larger, more edible shredded-cheese-esque pieces. Hot liquids may push lid off jar during blending. Performance So, how did the Hamilton Beach actually do during testing?
